Examiner is Solomon. Solomon describes a method for preparing microgels using a composition including a mono ethylenically unsaturated monomer, a multi-ethylenically unsaturated monomer, a source of free radicals (AIBN) and an alkoxyamine as control agents. See Solomon, page 2, lines 3-25; Example. The present invention differs from Solomon in that the present invention requires a polymer comprising one or more thiocarbonylthio groups.

6. As of the date of this Notice of Allowability, the Examiner has not located or identified any reference that can be used singularly or in combination with another reference including Solomon to render the present invention anticipated or obvious to one of ordinary skill in the art.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
